This study was performed in the field by practicing Biofeedback technicians. Data was collected and the study supervised by the Ethics International Institutional Review Board of Romania. The Data analysis and study presentation is done By the The Centro Ricerche, University of Venice + Padova, Italy

Abstract:

A global and momentous research project was developed for the last three years. The SCIO device is a Universal ElectroPhysiological device used for stress reduction and patient treatment. Over 2,500 qualified biofeedback therapists joined our Ethics Committee study to evaluate how stress reduction using the SCIO device could help a wide variety of diseases.

The device and thus the study has insignificant risk. There was a staff of medical doctors who designed and supervised the study.

Over 98,000 patients gave informed consent and participated in the study. The study would conclusively prove safety and efficacy of the SCIO Device. With over 60% of these patients having multiple visits. There were over 275,000 patient visits. Over 220 different diseases were reported. With a total record of the SCIO patient information, therapy parameters and reactivity data. No names of patients were recorded for confidentiality.

Two of the 2,500 plus therapists were given blank devices that were completely visually the same but were none functional. These two blind therapists were then given 35 patients each. This was to evaluate the double blind component of the placebo effect as compared to the device. Thus the studied groups were a placebo group, a subspace group, and a attached harness group. The Placebo group was then moved into the harness group to validate the harness effect. Several of the harness group were then tested with the placebo protocol to also reevaluate the effect.

This study verifies the safety and efficacy of the SCIO device. There were small effects seen in the placebo group, larger effects in the subspace, and astounding effects in the real harness group.

The cross placebo group testing showed further effects. The placebo group got much better results when moved into the harness group. And when some of the harness

group where moved into the placebo protocol the effects was diminished.

Introduction:

This research is to produce a large scale study of people with a wide variety of diseases to see who gets or feels better while using the SCIO for stress reduction and patient monitoring. The SCIO is a evoked potential Universal ElectroPhysiological Medical apparatus that gauges how a individual reacts to miscellaneous homeopathic substances. The device is registered in Europe, America, Canada, S Africa, S. America, Mexico and elsewhere. The traditional software is fully registered. Some additional functions where determined by the manufacturer to be worthy of evaluation. Thus a study was necessary to determine safety and efficacy. (As a result of these studies these additional functions are now registered within the EC)

An European ethics committee was officially registered and governmental permission attained to do the insignificant risk study. Qualified registered and or licensed Biofeedback therapists where enlisted to perform the study. Therapists were enrolled from all over the world including N. America, Europe, Africa, Australia, Asia, and S. America. They were trained in the aspects of the study and how to attain informed consent and transmit the results to the ethics committee or IRB (Institutional Review Board).

2,569 therapists enlisted in the study. There were 98,760 patients. 69% had more than one visit. 43% had over two visits. There were over 275,000 patient visits recorded. The therapists were trained and supervised by medical staff. They were to perform the SCIO therapy and analysis. They were to report any medical suspected or confirmed diagnosis. Therapists personnel are not to diagnose outside of the realm of their scope of practice. Then the therapist is to inquire on any reported changes during the meeting and on follow-ups any measured variations. It must be pointed out that the Therapists were free to do any additional therapies they wish such as homeopathy, nutrition, exercise, etc. Therapists were told to not recommend synthetic drugs. Thus the evaluation was not reduced to just the device but to the total effect of seeing a SCIO therapist.

- Part 1. The emphasis was on substantiating safety followed by efficacy of the SCIO.
- Part 2. Proving the efficacy of the SCIO on diseases (emphasis on degenerative disease)
- Part 3. Proving the efficacy of the SCIO on the avant garde therapies of

Complementary Med
Part 4. QQC standardization

Methods and Materials:

SCIO Device:

The SCIO is an evoked potential Universal Electro-Physiological Medical device that measures how a person reacts to items. It is designed to measure reactions for allergy, homeopathy, nutrition, sarcodes, nosodes, vitamins, minerals, enzymes and many more items. Biofeedback is used for pre-diagnostic work and or therapy.

The QXCI software will allow the unconscious of the patient to guide to repair electrical and vibrational aberrations in your body. For complete functional details and pictures, see appendix.

Subspace Software:

The QXCI software is designed for electro-physiological connection to the patient to allow reactivity testing and rectification of subtle abnormalities of the body electric. If a patient is not available a subspace or distance healing link has been designed for subspace therapeutics. Many reports of the success of the subspace have been reported and thus the effectiveness and the safety of the subspace link is part of this test. Many companies have tried to copy the subspace of Prof. Nelson and their counterfeit attempts have ended in failure.

SOC Index:

The SCIO interview opens with a behavioral medicine interview. This is called the SOC Index. Named after the work of Samuel Hahneman the father of homeopathy, he said that the body heals itself with it's innate knowledge. But the patient can suppress or obstruct the healing process with some behavior. Hahneman said that the worst way to interfere with the healing natural process was allopathy or synthetic drugs. Theses upset the natural healing process by unnatural intervention and regulation disturbance. Other ways to Suppress or Obstruct the Cure are smoking, mercury amalgams, stress, lack of water, exercise and many others. This behavioral survey then gives an index of SOC.

The scores relate to the risk of Suppression and Obstruction to the natural Cure. The higher the scores the more the Suppression and or Obstruction. The scores of 100 or lower are ideal. A copy of the SOC index guestions appear in the appendix.

Study Technicians:

The study technicians were educated and supervised by medical officers. The study technicians were to execute the SCIO therapy and analysis. All were trained to the standards of the International Medical University of Natural Education. Therapists from all over the world including N. America, Europe, Africa, Australia, Asia, S. America and elsewhere were enlisted to perform the study according to the Helsinki study ethics regulations.

They were to chronicle any medical suspected or confirmed diagnosis. Therapists personnel are not to diagnose outside of the realm of their scope of practice. Then the study technician is to inquire on any disclosed observations during the test and on follow-ups report any measured changes.

To test the device as subspace against the placebo effect, two of the 2,500+ therapists were given placebo SCIO devices that were totally outwardly the same but were not functional. These two blind therapists were then assigned 35 patients each (only 63 showed). This was to assess the double blind factor of the placebo effect as compared to the device. Thus the studied groups were A. placebo group, B. subspace group, and C. attached harness group.

Cross placebo group manipulation was used to further evaluate the effect.

Important Questions: these are the key questions of the study

- 1. Define Diseases or Patient Concerns
- 2. Percentage of Improvement in Symptoms
- 3. Percentage of Improvement in Feeling Better
- 4. Percentage of Improvement Measured
- 5. Percentage of Improvement in Stress Reduction
- 6. Percentage of Improvement in SOC Behavior
- 7. What Measured+How (relevant measures to the patient's health situation)
- 8. If Patient worsened please describe in detail involving SOC

After the patient visit is was complete the data was e-mailed to the Ethics Committee or IRB for storage and then analysis. This maneuver minimized the risk of data loss or tampering. Case studies were reported separately in the disease analysis.

Part 1. Results:

Before we review the direct disease improvement profiles, we need to review the overall results. The first most basic of question in the results is the basic feedback of the generic patient conditions. With over 98,000 patients and 275,000 patient visits we have direct evidence of the safety and efficacy.

- 1. Percentage of Improvement in Symptoms
- 2. Percentage of Improvement in Feeling Better
- 3. Percentage of Improvement Measured
- 4. Percentage of Improvement in Stress Reduction
- 5. Percentage of Improvement in SOC Behavior

The SOC index gives us great insight to this study. Each disease has a different cut off where the ability of the SCIO to help was compromised. As a general index scores of 200 + where much less successful.

OVERALL ASSESSMENT

A. Placebo Group- 63 patients and 102 visits with a Dbl Blind System and no Treatment

There were no cases of patients who reported a negative Improvement.

There were

19 cases reporting no improvement of Symptoms,

19% of group

30% of group

12 cases reporting no improvement in feeling better,

20% of group

13 cases reporting no improvement in stress reduction

12%--- Percentage of Improvement in Symptoms

15%--- Percentage of Improvement in Feeling Better

B. Subspace Treatment 80,688 patient visits

There were 453 cases of patients who reported a negative Improvement.

There were

433 cases reporting no improvement of Symptoms,

.005% of group

567 cases reporting no improvement in feeling better.

.007% of group

322 cases reporting no improvement in stress reduction .004% of group

35%--- Percentage of Improvement in Symptoms

46%--- Percentage of Improvement in Feeling Better

12%---.Percentage of Improvement Measured

49%-- Percentage of Improvement in Stress Reduction

14%----Percentage of Improvement in SOC Behavior

C. SCIO Harness Treatment 196,312 patient visits

There were 658 cases of patients who reported a negative Improvement.

There were

512 cases reporting no improvement of Symptoms, .003% of group

759 cases reporting no improvement in feeling better, .004% of group

460 cases reporting no improvement in stress reduction .002% of group

65%--- Percentage of Improvement in Symptoms

56%--- Percentage of Improvement in Feeling Better

24%---.Percentage of Improvement Measured

53%-- Percentage of Improvement in Stress Reduction

20%----Percentage of Improvement in SOC Behavior

D. Placebo Group To Test Group Rotation- 60 cases moved from placebo to SCIO Harness Treatment

There were no cases of patients who reported a negative Improvement.

There were

11 cases reporting no improvement of Symptoms, 19% of group

11 cases reporting no improvement in feeling better, 19% of group

10 cases reporting no improvement in stress reduction 18% of group

46%--- Percentage of Improvement in Symptoms

41%--- Percentage of Improvement in Feeling Better

22%---. Percentage of Improvement Measured

51%-- Percentage of Improvement in Stress Reduction

33%---- Percentage of Improvement in SOC Behavior

E. Harness group to Placebo Group- 43 cases from SCIO group moved to Dbl Blind System and no Treatment

There were no cases of patients who reported a negative Improvement.

There were

21 cases reporting no improvement of Symptoms, 51%

group

of

24 cases reporting no improvement in feeling better,

58% of group

19 cases reporting no improvement in stress reduction

5%---- Percentage of Improvement in SOC Behavior

GROUPS B+C –SOC Index 150 or below= B, above = C

B. Subspace Treatment 35,621 patient visits SOC Index 150 or below

There were 25 cases of patients who reported a negative Improvement.

There were

123 cases reporting no improvement of Symptoms, .003% of group 211 cases reporting no improvement in feeling better, .004% of group 97 cases reporting no improvement in stress reduction .004% of group

38%--- Percentage of Improvement in Symptoms

48%— Percentage of Improvement in Feeling Better

20%---. Percentage of Improvement Measured

48%-- Percentage of Improvement in Stress Reduction

13%---- Percentage of Improvement in SOC Behavior

B. Subspace Treatment 45,067 patient visits, SOC Index above 150

There were 20 cases of patients who reported a negative Improvement.

There were

310 cases reporting no improvement of Symptoms, .008% of group 356 cases reporting no improvement in feeling better, .009% of group 225 cases reporting no improvement in stress reduction .007% of group

32%--- Percentage of Improvement in Symptoms

45%--- Percentage of Improvement in Feeling Better

16%---.Percentage of Improvement Measured

54%-- Percentage of Improvement in Stress Reduction

C. SCIO Harness Treatment 101,832 patient visits SOC Index 150 or below

There were 488 cases of patients who reported a negative Improvement.

There were

513 cases reporting no improvement of Symptoms, .004% of group 530 cases reporting no improvement in feeling better, .012% of group 443 cases reporting no improvement in stress reduction .008% of group

67%--- Percentage of Improvement in Symptoms

54%--- Percentage of Improvement in Feeling Better

28%---.Percentage of Improvement Measured

57%-- Percentage of Improvement in Stress Reduction

29%----Percentage of Improvement in SOC Behavior

C. SCIO Harness Treatment 94,480 patient visits, SOC Index above 150

There were 231 cases of patients who reported a negative Improvement.

There were

213 cases reporting no improvement of Symptoms, .003% of group 529 cases reporting no improvement in feeling better, .004% of group 317 cases reporting no improvement in stress reduction .002% of group

64%--- Percentage of Improvement in Symptoms

56%--- Percentage of Improvement in Feeling Better

22%---.Percentage of Improvement Measured

52%-- Percentage of Improvement in Stress Reduction

17%----Percentage of Improvement in SOC Behavior

Overall Discussion:

There are several quite apparent results from our study. First the safety of the device is firmly established as a minimal risk. There is an insignificant report of negative results and no reports of any significant problems.

Second the difference in the placebo group versus the subspace group is significant although minimal. This proves the efficacy of the subspace therapy. There is a large difference in the harness group. This notes the large effect of the harness versus the subspace.

Next there is a significant difference in the SOC Index. Patients below SOC Index

150 had significantly better results in all conditions. This points to value of behavioral medicine interview and the need to reduce suppression and obstruction of cure ability.

The major findings are the significant positive effect on healing the SOC Index and the harness have. Users should note this result.

The significant measured criteria of the diseases will take volumes in reporting. There are case studies and measured criteria that will be presented. This will be in a continuation of this study in part 2. A list appears in the Appendix.

The twofold cross placebo group manipulation will establish the effect of the system in exquisite statistical terms.

----APPENDIX—

List Of Diseases Reported:

ACNE VULGARIS

ACQUIRED IMMUNE DEFICIENCY SYNDROME | AIDS

ADULT /ACUTE RESPIRATORY DISTRESS SYNDROME (ARDS)| Lung cell injury then respiratory failure, pulmonary edema (dropsy), high protein levels in fluids, hypoxemia (blood oxygen def.)

ACROPARESTHESIA | Numbness of extremities.

ALCOHOLISM

ALZHEIMER'S DISEASE

ARTERIOLOSCLEROSIS _ HARDENING OF THE ARTERIES

ASTHMA

ASTHMATIC BRONCHITIS | Lung

BACTERIA INFECTION _ BACTEREMIA

SPORT INJURIES

STOMACH PAIN

ANEMIA

ANGINA PECTORIS Heart Pain

EMPHYSEMA

LUPUS ERYTHEMATOSUS Presence of circulating auto antibodies to red

cells, platelets, and white cells.

EPSTEIN BARR VIRUS (EBV) _ INFECTIOUS MONONUCLEOSIS Herpes, cellular enlargement, chronic fatigue, weak liver, nasopharyngeal carcinoma, Burkitts lymphoma.

BONE SPUR

BRAIN TUMOR

BREAST CANCER

BURSITIS | Inflammation of a bursa, especially those located between bony prominence and muscle or tendon, as the shoulder, knee.

BULIMIA | Purging induced vomiting after eating for weight loss.

CANCER

CANDIDA | Fungus

CARDIAC ARRHYTHMIA _ IRREGULAR PULSE | Heart

CIRRHOSIS | Scar tissue in liver. }

COMA

COMMON COLD

CONGESTIVE HEART FAILURE

CONJUNCTIVITIS | Eye disorders

CONSTIPATION | Bowel, colon, intestine

CROHN'S DISEASE | Irritation, bleeding or swelling in small intestine (bowel, colon, intestine) from fungus.

DEAFNESS _

DEMENTIA DISORDERS

DEMYLEINATION DISORDER

DEPRESSION _

SEASONAL AFFECTIVE DISORDER | Depression from lack of light in Winter. ENDOMETRIOSIS | Excess growth of female endometrium tissue from excess

stress.

SCIO device functions assayed in the study

- 1. Provocative Allergy Tests
- 2. Infection Reaction Testing and Immune Stimulation
- 3. Electro-Acupuncture
- 4. Neurological-Stimulation
- 5. Biofeedback-Psychological Interaction Unconscious Interface
- 6. Muscle-Neurological Reeducation
- 7. Homotoxicity and Homeopathy Scan
- 8. Injured or Diseased Tissue Detection and Repair
- 9. Dental Disease Detection and Repair
- 10. Superlearning
- 11. Electrophysiological Diagnosis and Therapy
- 12. Behavioral Management Profiles and Therapy
- 13. Chiropractic Analysis and Therapy
- 14. Bioresonance
- 15. Brain wave detection and correction
- 16. Weight loss
- 17. Correction of aberrant body electric profiles such as proton pressure, electron pressure, reactivity patterns, oscillation disorders, trivector imbalance. Etc.

Informed Consent:

The SCIO Biofeedback Medical device is registered in the USA, Europe, S Africa, Mexico, Australia etc. It is a evoked potential Biofeedback device that measures how a person reacts to items. It is designed to measure reactions for allergy, homeopathy, nutrition, sarcodes, nosodes, vitamins, minerals, enzymes and many more items. Biofeedback is used for pre-diagnostic or therapy. These functions are registered in all of the above regions. Eclosion and Maitreya manufacture the hardware. Eclosion distributes the SCIO software.

At QX Ltd., we have written a software that uses the SCIO data in more avant garde ways. This software offers no risk and is completely safe. We recognize that this new type of system needs to be tested experimentally. The USA allows us to develop an Institutional Review Board and operate an Investigational Device Exemption for this software. To use this software in the USA we need to get informed consent from the patients or persons who are tested. Informed consent must be signed, implied, or understood.

The registered SCIO software and hardware uses a micro current medically safe pulse applied to the wrists, ankles and forehead. We safely measure some of the electrical aspects of the body. A variant micro current is then adapted to the patient to feedback the signal. The QXCI software will use the same medically safe standards to develop a wider range of variant wave forms to the body. The patient will choose and direct the therapy by their unconscious electrical reactions. The QXCI will also use a subspace system or Prayer wheel if there is no biological signals present. The system will show the patient reactions to homeopathic or nutritional items. This will help the therapist and the patient choose items that might be helpful. These choices are voluntary suggestions. The patient can greatly benefit from help with these choices. No items of significant risk are possible. These items are not part of the study and purchase of them is the

patient's responsibility.

There is insignificant risk and the only discomfort is sitting still for the 30 or 40 min evaluation. The patient name will be held confidential in the study. Participation is always purely voluntary. There is no penalty for withdraws. The other facts of the case are e-mailed to QX ltd IRB. The FDA of America reserves the right to inspect records. But confidentiality is always guaranteed.

The results of the studies are to be published on the International Journal of the Medical Science of Homeopathy. These results are available in 2006 on the internet or through your therapist. Over 35 studies on the device have already been published.

Since there are over 20,000 SCIO machines around the world, and all have access to the QXCI software, assuming 10 patient visits a week there might be over 400,000 data streams per month. We fully expect over a million bits of data in the first year alone. We will analyze all types of diseases - all types of clients - in one of the world's largest studies of its kind. We welcome your participation.

The clinical therapist is responsible for ensuring that informed consent is obtained from each research subject before that subject participates in the research study. FDA does not require the therapist to personally conduct the consent interview. The therapist remains ultimately responsible, even when delegating the task of obtaining informed consent to another individual knowledgeable about the research.

The Centro Ricerche of Prof. William Nelson University of Venice + Padova, Italy Is the headquarters for the study IRB. There are researchers in over 25 different countries. If you have questions or comments please ask your therapist or send them in writing to www.irbqxci.net.

I am informed of the experiment on the QXCI software. I willingly give my consent to participate in the study. I give my consent for any children under my supervision or custody. I am to be guaranteed confidentiality of the data. I will be allowed to see the results of the publication in roughly one year. I recognize that there is no firm diagnosis resulting from the software. We are diagnosing and treating only Stress via Biofeedback. I give my full and informed consent to partake in this research.

ltd

Basic SCIO System Description

The SCIO system is a Universal Electro-Physiological Patient Interface. It can measure changes of electrical nature such as electro-potential, micro-amperage, voltage, galvanic skin resistance. This allows inference of oscillations, frequency, capacitance, electrostatic potential, inductance, electromagnetic potential, susceptance, reactance, micro-wattage, resonant frequency, oxidation potential, hydration potential, and proton versus electron pressure.

A subspace component of the software allows for a distance patient link using an intent driven quantic subspace interface.

The basic science was generated by Prof. William Nelson. His book the PROMORPHEUS was registered in it's first form by the Library of Congress USA in 1982. Thus book introduces the concepts of the SCIO.

The basic technology was developed in 1985 and was registered as the EPFX in America in 1989. The EPFX stands for the acronym Electro-Physiological Feedback Xrroid. A Xrroid is the rapid testing of homeopathic medicines by an electrical reactivity device. The reactions are of a ionic nature as they reflect electro-potential changes. The speed of ionic exchange in the human body is approximately one hundredth of a second. So a computer device was needed for such testing.

Analysis of the trivector field of a homeopathic is developed in this work and patented in Ireland in 1995. All substances have a particular volt-ametric or polography field. By description of the right hand rule all electrical activity takes place in three dimensions, Conductivity, Static, and Magnetic. An advanced three dimensional field analysis device known as the QQC was made and patented by William Nelson.

Since the measure of galvanic skin resistance requires a applied current, the applied current could be of the trivector analysis variety. The applied current could also be used for electro- therapy. Aberrant electrical patterns of the patient could be corrected by application of electrodynamic theory. When electricity flows

thru healthy tissue it has a known result. When it flows thru injured or diseased tissue it has a different result. Application of electrodynamic theory produces the ability of the SCIO device to treat and correct injured or diseased tissue. This process is known as rectification.

These trivector signatures could be computerized and duplicated by the computer. A quantic coherency test kit was coupled to the system to improve data. The SCIO was then able to measure before and after electro potential changes to determine reactivity and susceptance. Providing a reactivity profile. When this is done at biological speeds of about one hundredth of a second it is called the Xrroid.

Thus the SCIO system could measure the basic elements of the body electric. Aberrant reactivity patterns could also be corrected using the principles of bioresonance in a process also known as rectification of electrical patterns.

The Electro-Physiological-Feedback-Xrroid / SCIO is also a biofeedback system. The definition of biofeedback is measuring a physiological response and feeding it back to the patient. Most of the devices feedback the information primarily to the conscious and thus then to the unconscious of the patient. The EPFX-SCIO system differs in that it feeds back the information or signal to the unconscious primarily and conscious secondarily. The unconscious should be directing these autonomic processes. So our device focuses on repairing the unconscious link directly.

Feedback of electro physiological processes are given as relaxation signals to the patient. The EPFX system measures a combination of the following physiological functions, voltage potential, current potential, skin resistance, Electro Physiological Reactance, Electro Physiological Susceptance, skin temperature and Frequency. These are the raw readings made at the extremities and the head harness. (see Diagram). The EPFX system applies a variant set of signals and then measures changes in the readings. The changes determine resonance, reactivity and coherency.

The QQC is a trademarked and proprietary process that does an analysis

of the Polographic or voltametric three dimensional electrical pattern of a substance. This produces a substance electronic signature field. The Fields of these substances are sent into the patient via the harness. These variant patterns are of 0 Hz to mega Hz and of variant wave forms.

The total current is never over 5 milliamps. This represents a safe system rated as insignificant risk. All medical safety tests and quality control processes are applied.

The patient is evaluated before and after stimulation to measure any evoked potential changes that show patient reactivity. The type intensity and style of reactivity evoked potential offers insight into the patient health. Types of item reacting can be a link to therapy or deeper diagnosis.

The variant wave forms are trivector (voltammetric signatures of the Acupuncture points, nosodes, sarcodes, allersodes, etc.) This allows Electro-Physiological-Reactivity measurements (EPR).

The evoked potential differences (EPR) are used to show a provocative allergy component. Provocative allergy tests show how a patient reacts electro physiologically to an item. Changes in histamine and other allergic reactions are preceded by electrical reactivity.

The EPFX measures the Electrophysiologic Reactivity intensity of the patient to thousands of QQC trivector patterns. These are patterns of reactions to Sarcodes, Nosodes, Allersodes, Isodes, Nutritional, Acupuncture points, Herbal, Imponderable and Classic Homeopathics. The reaction patterns or profiles can relate disturbances of the patient. Therapies can then be arranged to develop harmonic reactions, desensitizations, biological resonance or rectification processes. Biofeedback is the operation that allows for the cybernetic loop of systemic feedback. The loop of measured reaction and bio-varied resonance response allow for a true feedback for self corrective Electrophysiological therapy. Hence it is called the Electro Physiological Feedback Xrroid or as known in Europe SCIO.

Thus the SCIO device can perform the following functions

- 1. Provocative Allergy Tests
- 2. Infection Reaction Testing and Immune Stimulation
- 3. Electro-Acupuncture
- 4. Neurological-Stimulation
- 5. Biofeedback-Psychological Interaction Unconscious Interface
- 6. Muscle-Neurological Reeducation
- 7. Homotoxicity and Homeopathy Scan
- 8. Injured or Diseased Tissue Detection and Repair
- 9. Dental Disease Detection and Repair

PROCESS FOR MANUFACTURING HOMEOPATHIC MEDICINES

FIELD OF THE INVENTION

The present invention relates to a method for preparing a homeopathic carrier solution for subsequent use in a homeopathic medicine for increasing the efficacy of the homeopathic medicine, and to a homeopathic carrier solution prepared according to the method. The invention also relates to a homeopathic medicine comprising the homeopathic carrier solution, and to a method for preparing the homeopathic medicine.

BACKGROUND TO THE INVENTION

Homeopathic medicines are well known, and in general, are manufactured using the Hahnemanian process. In general, the active homeopathic ingredient is dispersed in a carrier solution, generally, a solution of water and alcohol or an alkaloid mixture. Where the carrier solution is a water and alcohol base solution, the water is normally purified prior to mixing with the alcohol. The active homeopathic ingredient of the medicine is mixed with the carrier solution in the appropriate proportion to achieve the desired concentration of the active homeopathic ingredient in the carrier solution.

A 1× potency homeopathic medicine is a solution which comprises one part of active homeopathic ingredient to nine 30 parts of carrier solution. A 2x potency homeopathic medicine is a solution which comprises one part of active homeopathic ingredient to ninety-nine parts of carrier solution. A 3× potency homeopathic solution is one which comprises one part active homeopathic ingredient to nine 35 hundred and ninety-nine parts carrier solution. An Nx potency homeopathic medicine is a solution of one part of active homeopathic ingredient to (10^N-1) parts of carrier solution. In general, the appropriate proportions of active homeopathic ingredient and carrier solution are added to a 40 container and the active homeopathic ingredient is dispersed through the carrier solution by succussing the container which requires striking the container on a blunt object one or more times.

OBJECTS OF THE INVENTION

One object of the invention is to provide a homeopathic carrier solution which when carrying an active ingredient in a homeopathic medicine significantly increases the efficacy of the homeopathic medicine. Another object of the invention is to provide a method for preparing such a homeopathic carrier solution. It is also an object of the invention to provide a homeopathic medicine with a relatively high sefficacy, and in particular, an efficacy which is significantly improved over the efficacy of known homeopathic solutions. Additionally, it is an object of the invention to provide a method for providing such a homeopathic carrier solution.

It has been surprisingly found that the efficacy of a 60 homeopathic medicine may be increased by subjecting the homeopathic carrier solution to electrical treatments prior to the addition of the active homeopathic ingredient. It has also been found that the efficacy of the homeopathic medicine can be improved by adding sea water, brain hormone and 65 biologically active enzymes to the homeopathic carrier solution prior to adding the active homeopathic ingredient.

2

SUMMARY OF THE INVENTION

According to the invention there is provided a method for preparing a homeopathic carrier solution for increasing the efficacy of a homeopathic medicine comprising the carrier solution, the method comprising the steps of sequentially subjecting the homeopathic carrier solution to an alternating current electrical treatment and a direct current electrical treatment, the alternating current electrical treatment comprising the steps of subjecting the homeopathic carrier solution to an alternating current in the range of 1 milliamp to 100 milliamps at a potential in the range of 5 volts to 30 volts and at a frequency in the range of LKHz to 1,000 KHz. for a duration in the range of 20 seconds to 60 seconds, the direct current electrical treatment comprising the steps of subjecting the homeopathic carrier solution to a direct current in the range of 1 milliamp to 50 milliamps at a potential of 500 volts to 10,000 volts for a duration not exceeding 5 minutes.

In one embodiment of the invention the alternating current electrical treatment comprises the steps of subjecting the homeopathic carrier solution to an alternating current in the range of 10 milliamps to 50 milliamps at a potential in the range of 5 volts to 15 volts and a frequency in the range of 5 KHz to 20 KHz for a duration in the range of 25 seconds to 35 seconds.

In another embodiment of the invention the direct current electrical treatment comprises the steps of subjecting the homeopathic carrier solution to a direct current in the range of 15 milliamps to 25 milliamps at a voltage in the range of 900 volts to 1,100 volts for a duration in the range 3 minutes to 5 minutes.

Additionally, the invention provides a homeopathic carrier solution treated according to the invention. Preferably, the homeopathic carrier solution further comprising any one or more of the following ingredients:

sea water.

brain hormones, and

biologically active enzymes.

Further the invention provides a homeopathic medicine comprising the homeopathic carrier solution of the invention.

Additionally, the invention provides a method for preparing a homeopathic medicine of Nx potency, the method comprising the steps of preparing a 1x potency solution by adding one part of an active homeopathic ingredient and nine parts of the homeopathic carrier solution according to the invention to a container, and dispersing the active homeopathic ingredient through the homeopathic carrier solution by succussing the container by striking the container containing the active homeopathic ingredient and the homeopathic carrier solution on a blunt object, preparing a 2× potency solution by adding one part of the 1× potency solution and nine parts of the homeopathic carrier solution according to the invention to a container and dispersing the 1× potency solution through the homeopathic carrier solution by succussing the container containing the 1x potency solution and the homeopathic carrier solution by striking the container on a blunt object, and so on until an (N-1)× potency solution has been prepared, preparing the N× potency solution by adding one part of the (N-1)× potency solution and nine parts of the homeopathic carrier solution according to the invention to a container and dispersing the (N-1)x potency solution through the homeopathic carrier solution by successing the container containing the (N-1)x potency solution and the homeopathic carrier solution by striking the container on a blunt object.

EPFX / SCIO USE AND CLAIMS FOR THE DEVICE

EPFX / SCIO use and claim: Professional Biofeedback for Stress Detection and Stress Reduction.

We need to make very clear the use and thus claims for the EPFX Electro_Physiological_Feedback_Xrroid. The device has been legally FDA registered and marketed in America for twenty years.

The device is designed to measure and mend the body electric through a cybernetic biofeedback loop. It is designed and registered to send in a volt_ammetric electrical signal into the body, and then measure the reactivity or response to this signal. We measure the Volts, Amps, Oscillations of Volts and Amps, the Skin Resistance to the input signal, the Skin Temperature, and then calculate some virtual mathematical responses from the readings. All of this must happen at absolutely safe levels and adhere to stringent regulatory laws of the World government agencies . First do no harm is the primary law of medicine, It is our Prime Directive.

In other words we stimulate the body with a small safe electrical measure of the body electric, calculate the reaction, stimulate again, re_measure, calculate, re_stimulate, and on and on in a cybernetic biofeedback loop. A loop designed to give awareness feedback on stressors, and to reduce stress. Thus the simple use statement and claims are the device is designed for biofeedback stress detection and stress reduction. There are those who do not agree of the power of stress reduction, but their views do not change the claims for the EPFX.

There is a vast amount of research showing the positive effects of stress reduction. Psycho-Somatic medicine has been proven for many decades. The Psycho-Neuro-Immuno link of the body is well documented. There is now the science of Psycho-Neuro-Immuno-Soma PNIS science, where the mind effects the neurology, the immunity, the body, and they all interact on each other.

The volt_ammetric signals are the volt_ammetric electro_chemical trivector signals calculated from the QQC device a registered medical device in Europe. The signals test homeopathic reactions to nosodes, sarcodes, allersodes, isodes, classical homeopathics, imponderables, hormones, enzymes, herbals, vitamins and other supplements. The skin resistance and electrical reactions to these compounds give us a Electro_Physiological_Reactivity (EPR)pattern. These reactions are not assuredly reliable, so please do not over react, but check any problem with more standard diagnostic means or refer to medical doctors who can.

Many many medical studies have shown that the EPFX / SCIO is helpful in treating a host of different diseases. The International Journal of the Medical Science of Homeopathy ISSN 14170876 has published over 100 such studies. The studies have proven the EPFX / SCIO therapy safe free from any significant risk. The studies have shown an Universal effectiveness, but the effect is from the original claim: Stress Detection (awareness) and Stress Reduction. Thus the EPFX device is designed for use on patients with some stress.

But even though the results are highly significant there is not enough evidence or need to readjust the original use and claims. Stress Detection and Stress Reduction are much more than enough. Even though Europe has allowed registration of many more claims, humbly we still maintain the simple, universal, unquestionable, and modest use and claim:

Stress Detection and Stress Reduction. Please do the same, offer no more claims than this.

In the medicine of Hans Selye, it is seen that stressors are the paramount problem in health care. All diseases start with a stressor and thus Stress Detection and Stress Reduction are truly early intervention health care.

With the Selye stress pathway of disease, we can see a universal, safe, and very effective way of helping people. By combining the Selye Stress systrm and the energetic medicine of the body electric we have for over twenty years developed a safe effective and legal system of biofeedback stress reduction medicine. The EPFX / SCIO device is sold only to professionals and under the order of a licensed health care professional. The SCIO bioresonance - biofeedback therapists are rigorously trained to:

- 1. Use safe forms of Stress Detection and Stress Reduction
- 2. Do a behavioral assay of how the patient may be suppressing and or obstructing their own natural innate curative process.
- 3. To refer to the patient's medical doctors, work with the system of medicine not

to interfere with any doctors program.

- 4. Try to increase patient awareness, education, and enthusiasm.
- 5. This education is exactingly supervised by the International Medical University of Natural Education. IMUNE

EPFX / SCIO use and claim: Professional Biofeedback for Stress Detection and Stress Reduction.

Stress Selye and the FLOW OF DISEASE

Disease starts when a stressor or blockage of flow causes a disruption in the flow. The ease is now dis-ease. Hans Selye outlined a medical system were disease comes into the body as some sort of stressor. This produces an ALARM reaction phase as that the body is trying to deal with the incoming stress. Thus the symptom is the ALARM reaction. If we fight the symptom not the cause we can interfere with healing. So when our child is exposed to a stress (like a bacteria from another child) a symptom presents, such as a sore throat. The symptom is sign of a disease in flow. The immune system needs help when it is burdened by stress. There is a proved Psycho-Immuno-Neuro link of the body that responds to any stress reduction.

As the stress continues the body acclimates and goes into the ADAPTATION phase. Here the symptom goes away from familiarization. But the disease progresses deeper. We now come to an ultra important conclusion that must change medicine forever. BEING SYMPTOM FREE IS NOT A SIGN OF HEALTH. In fact you can be symptom free and quite sick. Allopathy is for crisis intervention only.

If the stressor continues the body now progresses from the ADAPTATION phase to the EXHAUSTION phase. Here organs weaken. The first form is the FUNCTIONAL phase where organs dysfunction. They make less or excess hormones, enzymes, or others.

After a while they slip into the ORGANIC phase, where here the organs or organ will shrink (atrophy) or grow(hypertrophy).

There now is a physical disease. If the stressor continues the last phase results which is DEATH. Cellular death, organ death, organ system death, organism death. The next diagram relates the flow of disease. *HEALTH*

STRESSOR (TOXIN ETC)---->>---->>>

ADAPTATION
EXHAUSTION

FUNCTIONAL

ORGANIC

DEATH

The causes of disease or possible

stressors are:

LACK OF AWARENESS STRESS HEREDITY ALLERGY

TOXICITY
TRAUMA INJURY
PATHOGENS
PERVERSE ENERGY

MENTAL FACTORS

DEFICIENCY OR

OF

EXCESS NUTRIENTS

When these enter the body they disrupt the ease of flow. This produces the Alarm symptom. Then the body adapts, symptoms go away, but if the cause continues the disease continues. Degeneration awaits.

BEING SYMPTOM FREE IS NOT A SIGN OF HEALTH.

The ability to restore or heal the body is based on how much life force the body has. This has an electrical component. The life force can be suppressed or obstructed by lifestyle or stress. This is the SOC index in the SCIO software.

With the advent of fractal and chaos theory we have seen the end of reductionism as a basis for medicine. The Selye system of medicine is all based on removing the stressors and thus their mutual interactions. Stress reduction combined with a behavioral component now form a basis for a new addition to the medical community. The reductionistic diagnosis is left to others and with stress reduction and behavioral advise a complementary system of medical intervention can be very helpful.

In Nelson Natural Medicine the flow of treatment is as follows:

- 1. Reduce or remove the cause of disease reduce the SOC index get the patient to take responsibility for their disease and their bodies, minds and spirits.
- 2. Try to naturally encourage repair the damaged organs resulting from the disease, via behavioral education and stress reduction
 - 3. Unblock the blockages to flow of energy in the body. Chiropractic, Acupuncture, Bioresonance, Biofeedback and other medical arts are

dedicated to unblocking unbalances of flow.

4. Reduce the symptoms with natural methods and naturopathy, and never Interfere with the other doctors advise. Synthetic medicines are to be used when all natural methods fail. 5. Deal with the constitutional or metabolic typing, make up, or tendencies of the patient

EPFX WELLNESS BIOFEEDBACK CONSULTATION WAIVER EPFX / SCIO use and claim: Professional Biofeedback for Stress Detection and Stress Reduction.

- 1. I fully understand that the attending therapists are not allopathic doctors (M.D.'s) and do not pretend to be, but are wellness consultants and are biofeedback specialists.
- 2. I fully understand the difference between the practice of allopathic medicine, nutritional wellness consulting, and Biofeedback.
- 3. I fully understand that the services provided by the attending therapists are not allopathic, but are behavioral, educational or biofeedback in nature.
- 4. I fully understand that the attending therapists perform their services within the parameters of a natural health care and wellness system using biofeedback and stress reduction.
- 5. I fully understand that the attending therapists do not offer allopathic drugs, surgery or chemical stimulants or radiation therapy. I understand that illness is not being diagnosed nor treated and that my wellness and stress are being measured.
- 6. I have solicited the attending, biofeedback therapists services in good faith, exercising my free will and following the dictates of my own conscience which allows me to select what I understand is most beneficial to my health.
- 7. I agree to consult my family medical doctor for a consultation of any risk or contraindications from biofeedback. If a medical doctor is not available, a referral for such services can be arranged.
 - 8. I presently seek counsel, advice, opinions, biofeedback or points of view and/or programs within the scope of the attending therapists wellness and stress reduction practice.
 I am aware and, release the biofeedback technician to do biofeedback tests and treatments.
 - 9. Please no taping or recording of any interview without permission, we

welcome taping but only with the permission of the therapist.

date

DISCLAIMER:

Electro Physiological Feedback Xrroid System EPFX

This system is to be used as a Biofeedback multimedia system. It is designed for stress detection and stress reduction. The device does not diagnose any disease other than stress. Stress can come from many sources, this system uses many multimedia treatments to treat stress. This device also measures patients Electrophysiological reactivity, which is another representation of stress

Only a licensed practitioner can diagnose a patient.

This system is calibrated to measure the very fine and subtle electrical and subspace reactions to a group of biological and medical substances. The sensitivity is set so fine so as to pick up the earliest sign of disease and distress. Thus the results might be below the client recognition. The readings should be evaluated by trained staff. use additional tests or referrals for further clarity.

No claims other that Biofeedback Stress detection and treatment are made of the system or results.

For questions or comments e-mail Maitreya and or Eclosion
